Omschrijving

Amazfit T-Rex 2

Rugged Outdoor GPS Smartwatch

Dual-band & 5 Satellite Positioning | Ultra-low Temperature Operation

Route Import & Real-time Navigation* | Military-grade Toughness | 24-day Battery Life

Super-tough from the Inside Out

Experience the thrill of the hunt with the absolute titan of toughness that is the Amazfit T-Rex 2. The watch has passed 15 military-grade tests¹ to prove it can be right there with you in the heat of the moment on your trails through humid rainforests, up mountains, or down in icy temperatures.

Rugged in Style

The bold and trend-setting look of the Amazfit T-Rex 2 is inspired by the spirit of nature. The HD AMOLED display is as clear as the purest ocean, and lets you reflect the wonders of the wilderness or the untamable urban jungle through dozens of watch faces with matching always-on displays². Download your favorite from the Zepp App, or even upload a unique image that means something special to you.

Ready for Action

The Amazfit T-Rex 2 has evolved to feature a large screen that makes it easier to see the data that's vital to your adventure - whether you're under the desert sun, the city streetlights, or camping out in the moonlight. The watch's matte finish and metal-sprayed outer bezel are also complemented by a sweat-wicking silicone strap that keeps the watch dry and comfortable as you brave the elements.

The Power to Endure Any Adventure

With a battery powerful enough to endure adventures up to 24 days at a time with typical usage³, the Amazfit T-Rex 2 is brimming with the energy you need to go on the hunt for adventure.

Ultra-low Temperature Operation

Built for the brave, the Amazfit T-Rex 2 is tough enough to be operated⁴ even in extreme temperatures as low as -30°C. So not only can the watch body physically resist the cold, but you can keep using the watch's functions as the conditions get more intense. Witness fortitude forged in ice.

Dual-band & 5 Satellite Positioning

Go beyond adventure with the watch's dual-band positioning and support for five satellite positioning systems, which can effectively reduce environmental interference and achieve more precise positioning⁵. Hikers, climbers, and explorers of any fashion can also conquer new heights and discover new paths with the T-Rex 2's built-in compass and barometric altimeter.

Route Import and Real-time Navigation

Want to hike a famous trail, or follow in the footsteps of someone you know? Unleash your inner explorer and tread new ground by importing route files from the Zepp App. Your movement along an imported route, and even your unique movement along your own developing route, can be displayed in real-time directly on the watch

Direct Return Navigation

Ancient Greek philosopher Archimedes famously said that the shortest distance between two points is a straight line. With that in mind, the Amazfit T-Rex 2 can show you the shortest straight line⁷ back to the start of your journey, so you can avoid the twists and turns when you're in a hurry.

Strength Exercise Recognition; Train the Beast Within

The Amazfit T-Rex 2 can automatically recognize the movements and count the reps of dozens* of types⁸ of strength training exercises, many of which have adjustable variations in the Zepp App, as well as track your rest time between sets to keep your training efficient.

After finishing the workout, the Zepp App will visually show you the muscle group you exercised and how long you exercised it for, so you can make sure you hit intended muscles for long enough.

Blaze Your Own Trail with Training Templates

Consistency is the key to success. Create your own training templates for 11 different sports⁹ in the Zepp App, which you can follow on your Amazfit T-Rex 2.

Each template can be divided into Warm Up, Training, Rest, Recovery, and Warm Down stages - which can be repeated up to 30 times per template. You can even arrange for the watch to send reminders or automatically change training stages based on your heart rate, workout duration, calories burned, and more. Interval training templates can also be created directly on the watch.

Go Wild with

150+ Built-in Sports Modes

The Amazfit T-Rex 2's huge selection of over 150 sports modes includes the toughness-testing Triathlon mode, the professional lap-data recording Track Run mode¹⁰, with smart trajectory correction, and the more leisurely Golf Swing mode. Whatever activity gets you going, you'll likely find a mode for it on the T-Rex 2.

Smart Recognition of 8 Sports

Roar into action quickly and easily. As soon as you begin one of these eight sports, the watch will sense your movement and automatically¹¹ suggest that you open the corresponding sport mode.

Brave the Storm with 10 ATM Water-resistance

For those with a sense of adventure that never gets drowned out, the watch has a water-resistance¹² grade of 10 ATM, meaning it can withstand the equivalent of 100 meters' water pressure. Brave the rain, rule the pool, and conquer the ocean with the Amazfit T-Rex 2.

Powerful Zepp OS Third Party App Support

¹⁵⁻²The rich app ecosystem includes over 10 mini apps, and you can even connect the watch to your GoPro* camera to record your outdoor adventures on-the-go. And with support for Home Connect, the watch can help enhance your daily life when you head back home.*GoPro will be available after OTA update.

¹⁵⁻¹The intuitive Zepp OS makes it easy to find what you're looking for on your Amazfit T-Rex 2. Seamless interactions, and a specifically tailored smartwatch UI, enhance the user-experience of this light and low power-consuming OS.
