## Omschrijving

Sony Alpha 7RV | Full-frame Mirrorless Interchangeable-lens Camera (61MP, Real-time autofocus, 10 fps, 8K, 4K60p)

The “α7R V” is a new camera with a great innovation in subject recognition performance with “AI processing unit” that is dedicated to artificial intelligence processing, including deep learning.

State-of-the-art AI processing uses detailed information about human skeleton forms and poses to dramatically improve the camera’s subject recognition accuracy and make full use of its potential resolution AI subject recognition has been expanded to include a number of new

subject types, including vehicles and insects.

The “ $\alpha$ 7R V” is the fifth model in the  $\alpha$ 7R series, delivering even higher still image quality than its predecessors plus refined 8K movie output, unlocking unprecedented subject detail and texture. It also includes the most effective 8-step image stabilization ever offered in an  $\alpha$  body, a new multi-angle monitor, high-speed communication functions. High-level operability and smooth workflow integration round out a camera that is ideal for professionals who need a first-class high-resolution imaging tool.

#### **AI POWERED AUTOFOCUS:**

Achieve accurate, fast, and consistent Real-time autofocus tracking of subjects with unique AI driven technology. You'll even experience an advanced recognition of additional subjects' eyes (human, animal, bird, insects, car, airplanes) with seamless implementation for a unique shooting experience. With this professional camera, shoot sharp pictures and video content, even in difficult conditions.

#### **OUTSTANDING DETAILS:**

The stunning 61MP back-illuminated full-frame sensor paired with the BIONZ XR™ image processing engine delivers outstanding detail and colour accuracy - even in difficult lighting. Shoot at up to 10 fps with a durable buffer or use the new Pixel Shift shooting mode to deliver a huge 240MP ultra-detailed image. For nature and wildlife enthusiasts, use the APS-C crop for extra reach and retain maximum quality with 26MP.

#### **MADE FOR PROFESSIONALS:**

The Alpha 7RV refines the professional shooting experience with 8-stops IBIS (In-body Image Stabilisation), high-resolution 9M dot EVF (Electronic Viewfinder), and a new unique 4 axis touch-capable screen. With a durable aluminium body and shutter taken from the Alpha 1, the Alpha 7RV aims at providing a smooth platform for photographers and video content creators who want to focus on their craft.

#### **8K & 4K60P VIDEO RECORDING:**

In addition to 8K and 4K recording, the Alpha 7RV delivers a professional video shooting experience with 10-bit 4:2:2 recording, S-Cinetone and S-LOG picture profiles, as well as long recording times, thanks to its heat dissipation system. Unique to the Sony eco-system, it also includes features like active stabilisation and breathing compensation for a unique experience when using Sony lenses.

#### **HIGH SPEED TRANSFER AND CONNECTIVITY:**

Responding to professional needs, the  $\alpha$ 7RV offers updated connectivity with high speed Wi-Fi 2.4Ghz/5Ghz transfer speed and a SuperSpeed USB-C 10Gbps connection to remote control or transfer the content faster. The camera also allows you to record in both CFexpress type A or SD in its two card slots for reliable media storage solution.

#### **GET THE BEST EXPERIENCE WITH SONY GENUINE LENSES:**

With 60+ genuine Sony lenses, take full advantage of your Alpha camera by using our latest GMaster & G lenses. Take full advantage of the camera's resolution and its unique autofocus system for the best results, while using unique Sony features such as breathing compensation.
